ABOUT

I'm a motivated DevOps enthusiast with hands-on experience in CI/CD pipelines, cloud technologies, infrastructure as code and containerization. I aim to apply my skills to improve operational workflows, streamline deployments, and help build efficient, scalable systems. Eager to contribute to a team while continuing to grow my expertise in a real-world DevOps environment.

EDUCATION

Bachelor of Business Information Technology
KCA university
DevOps course certificate program
Moringa School

SKILLS EXPERIENCE

Tools & Technologies: Docker, Kubernetes, Terraform,
Version Control: Git, GitHub
CI/CD Pipelines: Jenkins
Languages: Python ,Javascript react,C++
Soft Skills: Collaboration and teamwork, Communication, Critical Thinking, Flexibility
Projects
- Configuration management with ansible
- Developed reusable playbooks for server configuration infrastructure automation with Terraform where I deployed infrastructure on AWS using terraform and also automated the provisioning of EC2 instances.
